Fight the Weed Pests Now

September is the month that tells the tale in the summer-long battle with weeds. It is no more than natural to feel that, now that most of the farm crops have either been harvested or have grown to a point that makes cultivation impossible, the weeds can safely be disregarded until next spring. That is a mistake very common upon some farms.

The grain crops have been harvested, the corn laid by, the potatoes to be harvested shortly. Early in the season we engaged, as usual, in the fight against the weeds that always threaten to monopolize the soil. Many of these weeds are of the annual, self-seeding kinds. After thorough cultivation that gives growing crops a chance to get started, the land appears to be comparatively clean of weeds. Then, where do the seeds for next year's weed crop come from?

Many are carried for long distances by blowing dust and drifting snow, it is true. Many more are, perhaps, introduced by seed that has not been cleaned before planting. But, when the marvelous seed producing capacity of many of the annual weeds is considered, is it not safe to say that a large part of the weed infestation is carried over from year to year by the few weeds that are allowed to grow to maturity right on your own farm?

How thrifty those weeds look in the potato field! Not very many but plenty to "smut" the land for the season to follow. Fence corners, too, are veritable weed nurseries that can well be given a little attention. One weed taken off now may save hundreds to be taken off next spring.

Raymond's Grand Army

Canada's grandest army marched against the citadels of Ignorance last Tuesday. Raymond troops were mobilized with captains and lieutenants in command. Conscription was the rule. This campaign will continue until next July. A brief breathing spell—then on with the war! Our army is gradually conquering. But, the farther the enemy, Ignorance, is pushed back the greater appear to be his reserve forces. The struggle will never cease! And, as our army moves, so moves the town, the province and the nation. The annals of history contain no finer page than that which records the triumph of free public education in Canada.

Canadian children are privileged above all other children on earth. They are destined to grow into privileged men and women. They will be better able to cope with prejudice, class consciousness and narrow ideals,—an army developed intellectually, dedicated to the making of a better today than yesterday, a better tomorrow than either. They are an army whose continued well-being and happiness places an obligation upon every Raymond citizen to support our schools to the limit.

The Clean Town

Raymond is a clean town. Even the gravel for our new cement sidewalks is being washed! But that is not enough. There is need for several bad spots, evil, smelly spots, to be cleaned up—and cleaned up right.

If any town or city is ambitious for advancement, or if even a few of its men and women are ready to devote their time and energy to the betterment of the community, the surest way to achieve success is to clean up,—make back yards and front yards clean, make streets clean and keep them clean, encourage the people to beautify their homes and their yards, stimulate a love for and a pride in their homes and in their town, repair tumble-down fences, paint up, make things as clean outside as they should be inside, clean up Broadway back yards, and then our community will look up mentally and materially.

PROSPERITY FOLLOWING IN WAKE OF SUGAR FACTORY
Frank R. Taylor Visits Brooks. "Bulletin" Thinks He Was Looking for Factory Site

(Brooks Bulletin)

Prosperity is following in the wake of the sugar beet factory at Raymond. This was the statement of Mr. Taylor, one of the head men in charge of affairs at Raymond, who visited Brooks and district for a short time this week. He was met by a number of business men and citizens of Brooks after he had visited two or three plots of beets close to Brooks, and at a meeting in Berk's office imparted some information as to their operations at Raymond.

Raymond district is taking on new life. Not an acre of ground can be bought, leased or rented in that immediate district, Mr. Taylor said. Such was not the case to begin with, many farmers refusing to have anything to do with beet growing. A large number of these farmers, however, leased portions of their farms to those who would grow beets. Now that a big crop is assured everyone wants to sign a sugar beet growing contract, with the result that there is going to be more beets than the factory can handle if all who want to are allowed to grow them.

As far as Raymond has been (Continued on back page)

The Broadway Store

The gigantic 230 foot smoke stack at the factory was finished last Friday. The factory, itself, is nearing completion and is expected to go through its trial run about Sept. 15th.

I. Geo. Wood, manager of Canadian Sugar Factories, Limited, and his wife and three children arrived here last Saturday from Salt Lake City. The trip was made by auto.

Miss Eva Neel arrived here last week from Portland for a visit of a few days. She is taking a nurse training course in Portland.

The first ward choir enjoyed an entertaining evening last Friday at the home of S. F. Kimball.

The death of Mrs. John Neel occurred last Friday after an illness of several years. Funeral services were held on Tuesday.

Born—To Mr. and Mrs. H. M. Paterson, a son.

Local musical and dramatic circles are planning to produce a light opera, "Robin Hood" in being considered.

Justin Neel arrived here last Monday to attend the funeral of his mother, Mrs. John Neel.

Born—To Mr. and Mrs. John H. Blackmore, a son.

Monday, being Labor Day, both food banks will be closed.

The season for ducks, geese and Hungarian partridge opens Sept. 15th. For public chickens on Oct. 1st.

Stop! Look! Listen!

Within the short space of less than the life of a generation the automobile has worked a complete revolution in modes of transportation and in the lives of people. But owing to the recklessness of so many drivers of cars it has become a veritable nightmare to locomotive engineers. To a greater extent than anything else it is the cause of nervous breakdowns among trainmen.

This is the age of speed, and thousands of motorists delight in tearing along roads and over railway crossings at top speed although there is no need for haste. They ignore the fact that there is more real pleasure in being forced from leisurely driving, and that a moment's stop at a level railway crossing to allow an approaching train to pass is not lost time. They scorn the risk they themselves run, and every year hundreds pay the full penalty of their folly, while other hundreds have cause to remember in pain and a permanently crippled condition the terrible price they are paying on account of their heedlessness.

But there is another side to the picture, and a locomotive engineer of the Pennsylvania Railroad has written an article, appearing in The Outlook, in which he describes just what the reckless motorist, who tries to "beat" an express train to the crossing, costs the engineer in nerve stability, and the consequent danger to every passenger on the train. This article is so illuminating and finely that it is worthy of repetition. The locomotive engineer in question writes:

"Come and take a ride with me in the cab of my engine. I am going to drive her at the rate of sixty miles an hour, which means that sometimes she will go considerably faster than that. There will be thrills. Perhaps I should tell you in advance of some of the things you will see—and feel.

"There are grade-crossings, you know. The crossings are not dangerous, but the automobile creates a danger at them. I do not recall many trips when I did not have from one to three close calls. At practically every grade crossing without guard-gates some driver goes over after the whistle has been sounded. And where there are guard-gates, they sometimes smash them down and go over just the same. Perhaps you will understand the nature of the thrills better if I give you one or two specific instances.

"On the fifteenth of last January I took my run out at 5:41 a.m. An hour later, I was driving along at reduced speed, probably forty miles an hour. I whistled long and loud for a particularly bad crossing. When within about 150 feet of the crossing I saw lights bobbing around on the planks. That indicated an automobile—in motion. My fireman, as I afterwards learned, was looking directly at the car. It did not occur to him at first that the driver would try to get across. Then he saw him 'give her the gas.' Those bobbing lights, however, had enabled me to divine the driver's intention. I snapped the brake valve to full emergency position.

"We were three hundred feet past the crossing when the train stopped, but the emergency application of the brakes had stayed the engine the one instant that it took for the automobile to get over those rails. The fireman, in a tremulous voice asked me, 'Did he get over?' I answered, 'Yes, he did.' The fireman got up from his seat, came over to the gangway at the right side, and, talking as though that driver might be getting every word, said, 'Old fellow, no one but God saved you.'

"From that time on, I have been particularly careful, and having the signal to proceed, one of the engine's whistles started to blow off steam. I started involuntarily from my seat, and it was only with difficulty that I forced myself to remain in the cab.

"Another time before that, after I had sounded the whistle for the crossing, two automobiles shot across, one right after the other, at about forty-five miles an hour. I was thinking how much better judgment those fellows would have displayed if they had stopped and waited only one minute for my train to pass when the fireman shouted to me, 'There's another!' Like a flash, a large coupe went across at about sixty miles an hour. In that coupe was a little girl about five years old on her knees looking out of the rear window. A woman, doubtless her mother, was at the wheel. To me, it looked as though the woman was not thinking of her child, but only of not being outdone by those other two cars—or by that train, either."

This engineer concludes by asking: "Were you ever held up at the point of a gun? I never was, possibly because I never had anything that the other fellow wanted, but I have heard men describe the situation. The hole in the gun-barrel looked as big as a wash-tub, the bullets the size of cannon-balls. But that feeling, when contrasted with that of the engineer when he is about to strike an automobile, is about as placid as the waters of the Amazon compared with Niagara Falls."

Possibly it is too much to expect a motorist, who risks his own life and the lives of his companions in a car, to give the slightest consideration to the locomotive engineer, or to the hundreds of passengers on the train whose safety depends upon the steady nerves of the engineer. But what grim tragedies would be prevented and suffering avoided if people would only realize that there is nothing "smart" in being a reckless fool.

Plan Labor School

Efforts will be made to form a labor college for British Columbia during the sessions of a school of social science, which has been opened at Summerland, B.C. Men and women from all parts of the Canadian west, from as far east as Winnipeg, are scheduled to attend the meetings.

The older we grow the greater the lack of knowledge we discover in others.

Farmer Anderson: "So your boy's got home from college. Does he take any interest in the farm?" Farmer Gray: "He's beginning to. He's been showing me where we could have a fine golf course an' how easy 'twould be to turn the barn into a garage."

A moneylender had rather a grim experience the other day. He received an unstamped letter and, after paying the fee, found it contained a circular from another moneylender.

Note the flattened top of this fine kettle. No waste space above the water level. A very fast boiler. Specially neat in appearance.

Hinged lid at side of kettle for speedy filling under tap or by dipper; being hinged it cannot fall off or get lost.

Handle, extra large, rigid, shaped to fit the hand and always cool; being rigid you have perfect control at all times.

This kettle is made in SMP Pearl and SMP Diamond Enamelled Ware, also in nickel plated copper ware. The name Savoy and our trade mark on each genuine kettle.

SMP ENAMELED TEA KETTLE

Operated With Crude Outfit

Doctor in Alaska Used Jack-Knife and Denatured Alcohol

A tonsil operation was performed recently at Berling River on Controller Bay, 60 miles east of Cordova, Alaska, by Dr. W. W. Council, of Cordova, with a jack-knife and denatured alcohol.

When Dr. Council arrived at Berling River from a hunting trip he was called to handle the case. He had no implements. With the crude outfit he performed the operation with success. No anesthetic was administered. The alcohol was used to sterilize the knife.

Pain In The Muscles, Stiffness In Joints, Quickly Subdued By Nerviline

Those who have tested out numerous liniments will agree that where something is needed to dislodge a deep-seated, more or less chronic condition there is nothing to compare with Nerviline. It's because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary oil preparation, it has come to be known as King over all Pain. For Rheumatic conditions, muscular and joint stiffness, Nerviline works wonders. A trial proves this. Get a 25 cent bottle from your dealer to-day.

Building Great Cathedral

A further stage in the building of Liverpool Cathedral has just been entered upon, in the ceremony of "breaking of ground" for the foundations of the central space and tower, and of the western transepts.

When completed Liverpool Cathedral, which was begun in 1905, will be the second largest in the world. It is the only Anglican Cathedral in these islands to be built from the foundations since the reformation.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine to regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opiate, nor narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Irish Free State Will Likely Drop Most of Duties

The Dublin correspondent of the London Westminster Gazette says the tariff experiment started by the Irish Free State about two years ago has failed so signally that it is likely most of the duties will be dropped. The idea was, of course, to protect and foster Irish manufacturers, but, the correspondent writes, foreign goods have not been excluded, while prices naturally have risen and the consumers paid the penalty.

He cites the motor car trade among those especially affected, saying the purchase of cars has diminished considerably, while all goods, except tobacco and household furniture, have suffered and several Dublin firms have been unable to pay their way.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

Bear Took Photograph

A camper in one of the national parks in United States, had just set up a tripod to take some pictures of mountain scenery. A bear suddenly appeared and the amateur photographer started running down the mountain side. When the plate was developed later, it was found that the bear in some way had tripped the shutter of the camera and had taken a good picture of the man running down the mountain side.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. "Try it and you will be satisfied."

Medicine Hat Gets Convention Medicine Hat secured the 1926 convention of the Western Canada Irrigation Association when the matter was debated at the convention in session in Kelowna, B.C.

Minard's Lintment for Dandruff

W. N. U. 1691

A Freak Lightning Bolt

Bolt Doing Damage In Truro, N.S., Came From Cloudless Sky

From a cloudless sky a bolt of lightning, accompanied by a deafening thunder, descended upon Walker Street in Truro, N.S., shattered a tree, entered a house via the telephone wires, burned a telephone box, and left by an open door, in which a young child was standing.

The child was unhurt, but a pedestrian on Walker Street, was stunned and several others were shocked, while telegraph instruments a quarter of a mile away were put temporarily out of commission.

There was but one bolt of lightning and one clap of thunder and through it all the sun shone brilliantly and not a cloud was to be seen. A similar occurrence was recorded three years ago.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and—in some cases they may cause vomiting, that is an indication of their powerful action and not of any unseating property.

Eagles Travel By Aeroplanes

Two Birds Develop Ravenous Appetite On Unaccustomed Flight

A pair of golden eagles, presented to the Zoological Garden at Schoenbrunn by King Ferdinand of Rumania were shipped to their destination in an aeroplane. This unique mode of transporting the two sovereigns of the air was employed by orders of the Royal donor, who wished his gift to arrive as a surprise. The only effect this unaccustomed flight seemed to have had on the two birds was to give them a ravenous appetite.

SUNDAY SCHOOL LESSON

AUGUST 30

PAUL AND THE PHILIPPIAN JAILOR

Golden Text: Believe on the Lord Jesus, and thou shalt be saved. Acts 16:31.

Lesson: Acts 16:16-40.

Devotional Reading: Psalm 40:1-5, 11-13.

The Text Explained and Illumined

The soothing maid of Philippi, verses 16:18.—Some time after coming to Philippi, as Paul and his companions went to the place of prayer where he was wont to preach, he was annoyed by a fortune-telling maid who kept crying out after them. Her monotonous chant disturbed him, and drew an uncomfortable crowd of curiosity seekers. Day after day she cried, "These men are servants of the Most High God, who proclaimed unto you the way of salvation." In the margin of the Revised Version the alternative translation for "a soothing maid" given is "a maid having a spirit, a Python." The great dragon at Delphi slain by Apollo was called a Python, and according to Plutarch so also at this time was a ventriloquist. Dr. Ramsay says that "God the Highest" was a widespread pagan expression, and "salvation" was the object of many vows and prayers to the gods. He further says that the slave girl's mind became distorted and disengaged by her belief in her super-natural possession, but it became all the more acute in certain perceptions and intuitions, and she became at-once alive to the moral influence which this intense faith of the strangers gave them.

Paul in the name of Jesus Christ bade the spirit leave her. And she was freed. "Paul's power over her was not necessarily miraculous; it was that of a good man over a sensitive nature. This slave girl became the second Christian convert in Philippi and led up to another conversion equally strange."

Canada May Benefit

Englishman Left Fortune For Charity In United Kingdom

Nearly 200,000 pounds sterling for charity has been bequeathed by Col. J. Barlow, a magnificent supporter, in his lifetime, of Disley.

Col. Barlow made many visits to Canada in connection with rifle shooting. Canada may benefit under his will, as he left the residuary estate "to be applied, within 21 years of his decease, for such charitable purposes within the United Kingdom, Ireland, India, or any British state, colony, or dependency, as the trustees, in their wisdom, shall think fit."

Genuine BAYER ASPIRIN Say "Bayer" - Insist!

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians for 25 years.

Safe Accept only a Bayer package which contains proven directions Handy "Bayer" boxes of 12 tablets Also bottles of 24 and 100—Druggists Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mannesmann-Landesbank of Salsky-Hessle.

New Homestead Record Setting the highest monthly record in nearly three years, 109 homesteads and 12 soldier grants—a total of 121 quarter sections—were filed upon at the Dominion land office at Edmonton in the month of July.

The more man has, the more he wants—with the possible exception of the father of twins.

Cuticura Should Be In Every Home

Daily use of Cuticura Soap keeps the pores active and the skin clear and healthy, while the Ointment heals pimples and other irritations. Cuticura Talcum is a delicately medicated antiseptic powder of lasting fragrance.

Cleans woodwork, painted walls, tiles, linoleum, porcelain, etc.

MADE IN CANADA

This 1c Demonstration Sale positively ends Saturday, September 5th, 6 p.m.

I have purchased from (name of grocer) _____ (address) _____ (City) _____ (Street number) _____ (Name) _____ (City) _____

Send this coupon with one cent to _____ (City) _____ (Street number) _____ (Name) _____ (City) _____

Valid after September 5th. Each customer entitled to one can only at sale price of 1c.

WESTERN CLEANSERS LTD. CALGARY, ALTA.

WORLD HAPPENINGS BRIEFLY TOLD

Cardiff, Wales, is advertising for tenders for 500 wooden houses and expects to get them from Scandinavia. An expedition has left here to explore the eastern shores of the North Arctic Ocean, proceeding later to Cape Hope, Alaska. Lieut. Col. C. P. Meredith has taken over his duties as secretary of the League of Nations Society of Canada, succeeding H. G. Richardson, recently resigned. The delegates of the Empire Press Union, enroute to the Imperial Press Conference to be held in Australia, were given a civic welcome at Auckland, N.Z. Professor Henri Louis Bergson, France, has resigned as president of the committee of international intellectual co-operation of the League of Nations, on account of ill-health. The Soviet Government, dissatisfied with some of its foreign embassies and legations, is planning a sort of traveling check which will travel over the world and check up on the diplomats. It has been announced that all the provinces of the Dominion would be represented in the livestock exhibits at the Royal Winter Fair in Toronto. It was also stated British Columbia would send an exhibit of fruit. The British Columbia Legislature will assemble for its annual session on October 26. A fall session is preferred by a majority of members of the house to a spring sitting, such as had been postponed earlier in the year. Senator Webster has been in England making arrangements for the shipment of supplies of Welsh coal to Canada. In case of a coal miners' strike in the United States, the Welsh business will profit very materially by the Canadian trade. The probe conducted by chief inspector of prisons, A. L. McPherson, into the food served to prisoners in the jails and institutions of Ontario has revealed that there is no general objection to the mush and syrup diet prescribed by the regulations.

Effects Great Saving New Invention Saves Oil Company 50,000,000 Gallons of Gasoline a Year. Breathing losses of gasoline estimated at 50,000,000 gallons a year cut down by "breathing bags" developed for gasoline tanks by the Standard Oil Company of Indiana, according to a statement made public by the American Chemical Society. "Breathing losses" are the evaporation of gasoline in tanks due to the sun's heat. This must be allowed to escape from the tank through a vent, otherwise the pressure would injure or destroy the tank. The Standard Oil invention consists of a balloon which captures the escaping gas during the day and gives it back to the tank at night, so that the same gas is breathed over and over again without loss. The process was worked out by Robert E. Wilson, H. W. Atwell, E. P. Brown and E. W. Chenick, of the Standard Oil Company of Indiana.

King Presents Colors To Welsh Guards. These Bear Record of War History of Regiment. New colors were recently presented to the Welsh Guards. For the ten years since the formation of the regiment the Welsh Guards have carried colors on which no name of a battle has been emblazoned, but at a picturesque service at Windsor Castle, the King presented them with new colors that are a record of their glorious war history. The King said: "Ten years ago, when your regiment was raised, I presented its first colors at Buckingham Palace. Shortly after that period the regiment was called upon to fight for its country, and today its noble deeds in the Great War are inscribed upon your colors."

Good Fur Catch. The first batch of last winter's furs brought from the Far North by the steamer Distributor, from Aklavik, has arrived at Edmonton and is valued at approximately \$1,000,000. Good catches of furs were reported throughout the north. Walking machines, which can produce in a few hours the amount of wear on shoes that would actually take place in six months of use, are employed for testing the quality of shoes. A questionnaire recently issued in England shows that religious books stand next to fiction in favor with the reading public.

Wants To Establish Own Medical Register. Irish Free State Has Sounded Death Knell of Profession. The death knell of the medical profession in the Irish Free State has been sounded, in the opinion of many doctors, by an announcement of the government's intention to establish a separate and independent medical register and cut loose from the British General Medical Council, by which the medical faculty of Ireland hitherto has been controlled. The general result of the decision, which is to become effective next February, will be that doctors qualifying in the Free State will be unable to practice in Great Britain or Northern Ireland, while physicians from those places will be barred from Southern Ireland. The government's decision, however, must be ratified by the Irish Parliament, and medical men, it is stated, will seek to obtain majorities against the proposal both in the senate and Dail Eireann. President Cosgrave had issued an explanatory statement, seeking to allay the fears of those opposing the bill. Admitting there may be temporary disadvantages from the arrangement, he says, the government does not expect any serious reactions. "It is incompatible with our constitutional status," he adds, "that an important profession have its centre of gravity and disciplinary headquarters in another country."

Reaches Top Record. 68,000 Auto Licenses Issued in Saskatchewan This Year. Up to Aug. 12 68,000 private auto licenses had been issued in Saskatchewan, according to report of F. W. Kerr, provincial license inspector. This is an increase of approximately 4,000 over the record number issued in 1924. Truck licenses issued this year to date number 5,000. Mr. Kerr estimated that livery and dealer licenses issued so far would total approximately 1,500 each. Transferring of licenses from one car to another is another matter which is giving considerable trouble, he said. In changing cars, the owners must secure a transfer of license through the department. The mere transfer of the license plate from one car to another is not sufficient. Persons who do not see to the proper transfer of the license are actually driving the new car without a license. Many people are under a great impression as to the issuing of half-price licenses, Mr. Kerr said. These are not issued on and after July 1, but any person purchasing a car after October 1 may secure a license at half-price, but must furnish an affidavit that the car had not been used in the province prior to that date.

Find Moscow Very Dull. Foreign Envoys Do Not Have Much Social Life. To relieve the tedium of life among the foreign diplomats and newspaper correspondents, the Moscow Government has adopted the expedient of giving free theatrical entertainments once a month. Early in June a distinguished gathering of ambassadors, consuls and Soviet commissars were the guests of the Soviet Government at a concert given at the State Opera House, which was featured by ballet dances, operatic pieces and vocal solos by Bolshevik Russia's best artists. Moscow has not seen so many fine performances since the days of the Czar. The flags of all nations were seen, the French tri-color being especially conspicuous. It was believed the arrival of Jean Herbet, the new French ambassador, would relieve the dullness that pervades the foreign missions, but the hopes of those who sought greater social activity and gaiety have disappointed. The French ambassador and his wife live modestly at the former house of the Nansen Relief Mission, and already have adopted the quiet, unobtrusive social customs of their colleagues in the diplomatic missions. Had Learned To Be Brief. A member of the Scottish General Assembly who prides himself in enunciating brevity to the young mind, is telling a good story against himself. His son, who has returned to finish his summer term at an English school, started, if not gratified, him by a wire as follows: "S. O. S., E. S. D., R. S. V. P." The lad has now further distinguished himself, in reply to an anxious letter as to his final examination. "Hymn 345, verse 5, last two lines," which the anxious parent found to convey, "Sorrow vanquished, labor ended, Jordan passed."—Exchange. A good reputation is sometimes useful as a parachute to the man who rises rapidly in the world. There are more than 10,000,000 Baptists in the world.

CLIPSE FASHIONS Exclusive Patterns. 1139—Men's and youth's shirt, attached or separate collar, and turn cuffs. Sizes 34, 36, 38, 40, 42, 44 and 46 inches breast. Size 36 breast requires 3 1/2 yards of 32-inch or 36-inch material. Price 20 cents. 1139—Men's and youth's union suit; high or low neck, with or without set-in sleeve. Sizes 34, 38, 42 and 46 inches breast. Size 34 is for 32 or 34, size 38 for 36 or 38, size 42 for 40 or 42, and size 46 for 44 or 46. Size 38 breast requires 3 1/2 yards of 32-inch or 36-inch material. Price 20 cents. 1157—Men's and youth's nightshirt, with or without yoke and fullness at back. Sizes 36, 40, 44 and 48 inches breast. Size 36 is for 34 or 36, size 40 for 38 or 40, size 44 for 42 or 44, and size 48 for 46 or 48. Size 40 breast requires 3 1/2 yards of 36-inch, or 4 1/2 yards of 40-inch material. Price 20 cents. Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centers, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

Is Comparatively Young Man. Doctor Gye Who Made Discovery in Connection With Cancer Germ Only Forty. Dr. William E. Gye, whose researches and discoveries in connection with the cancer germ have attracted world-wide attention has only recently arrived at his fortieth birthday. Despite his comparative youth, Dr. Gye has already made several valuable contributions to medical science. Some years ago he made a noteworthy discovery in diseases of the nervous system and a little later he came into notice by researches into the poisonous effects of various kinds of dust. The most of Dr. Gye's work has been done in connection with the National Institute of Medical Research, with which he has been connected for several years. He is the son of an English railway laborer, and he himself worked as a railway porter to earn money for his education at the University of Edinburgh. During the war he served with the British Medical Corps in France and Italy.

The Lure of the Undiscovered. Many Of World's Secrets Are Yet To Be Discovered. Lincoln Ellsworth is deservedly honored in Norway as a brave man, a real explorer and the patron whose financial gifts made the Amundsen explorations possible. It is the latter role that may serve to inspire other rich men. There are many of the world's secrets yet to be solved. The Prince of Monaco used to study the ocean, and his work is in a way continued by the wealthy Americans who have contributed to William Beebe's expedition. Western and Central Asia, much of Africa and South America, and both polar caps provide fine hunting grounds for anyone who wants to find out what's what and has funds enough to permit him to do so.—Baltimore Sun.

G. Washington, Jr. A hardware merchant advertised for a boy. A red-haired, red-faced youth applied for the job. "Do you like work?" asked the merchant. "No, sir," said the lad. "Then you can have the job! You're the first boy who's been here today and hasn't told a lie."

CLIPSE FASHIONS Exclusive Patterns. 1046—Men's and youth's shirt, attached or separate collar, and turn cuffs. Sizes 34, 36, 38, 40, 42, 44 and 46 inches breast. Size 36 breast requires 3 1/2 yards of 32-inch or 36-inch material. Price 20 cents. 1139—Men's and youth's union suit; high or low neck, with or without set-in sleeve. Sizes 34, 38, 42 and 46 inches breast. Size 34 is for 32 or 34, size 38 for 36 or 38, size 42 for 40 or 42, and size 46 for 44 or 46. Size 38 breast requires 3 1/2 yards of 32-inch or 36-inch material. Price 20 cents. 1157—Men's and youth's nightshirt, with or without yoke and fullness at back. Sizes 36, 40, 44 and 48 inches breast. Size 36 is for 34 or 36, size 40 for 38 or 40, size 44 for 42 or 44, and size 48 for 46 or 48. Size 40 breast requires 3 1/2 yards of 36-inch, or 4 1/2 yards of 40-inch material. Price 20 cents.

Free Insulin. New Government Policy to be Administered in Alberta. Free insulin supplies will be provided by the Alberta department of health in cases where the patients are not able to otherwise secure them. Hon. George Hoadley, minister of health, announces this as a new government policy to be administered through that department. The minister's attention to the matter was invited a short time ago by the editor of the Hanna Herald, who reported a number of cases in need of treatment but unable to meet the cost. It has now been decided to provide insulin for all such cases making application, and supplies will be sent out from the health department in Edmonton. Each application will be received and dealt with on its merits and necessary investigation as to medical diagnosis and financial circumstances will be made before issuing the supplies. Alberta will in this way be adopting a similar course to that already taken by the province of Ontario.

Canada Interested In Radio. Canada spent \$5,614,790 on radio sets and parts in 1924. Public interest in radio broadcasting, and the consequent demand for apparatus has created a new industry. A report issued by the Dominion bureau of statistics shows that production of radio sets and parts in Canada last year amounted to \$3,201,103. Radio licenses were issued by the department of marine and fisheries during the 12 months ending March, 1925, to 82,996 persons. Ontario led all provinces with a total of 41,847. Saskatchewan took 9,303, Manitoba 6,553, British Columbia 6,409, and Alberta 5,843.

Venice May Lose Isolation. Automobile Road Will Connect Island With Rest of Italy. Loss of the isolation which the city of Venice, an island, has enjoyed for centuries is threatened by the arrangements which have been completed for the construction of an automobile road connecting Venice with Padua. Later, it is planned to join this road to the Padua-Milian road. The importance of this project arises from the fact that hitherto the city of Venice has never been joined by road to the rest of Italy, the only communication being by boat or by train crossing by means of a pontoon bridge.

Has Remarkable Brain. American Now Visiting in London Gives Astonishing Exhibition. Six brains in one are said to be possessed by Mr. Harry Kaine, an American now visiting in London. Simultaneously he will read a newspaper, write the headlines upside down and backwards on a blackboard, at the same time spelling the words (to the right way); speak continuously to his audience; answer questions giving the exact populations and industries of the biggest towns of Great Britain, Canada and the United States; write backwards and upside down columns of figures which totalled 7,123,546,937, a figure previously agreed upon by the audience.

Will Make Another Trial. Amundsen Plans New Polar Expedition For Next Summer. The Aften Posten, Oslo, Norway, states Captain Amundsen, since his arrival home from his recently attempted flight to the North Pole, has been preparing a new aeroplane expedition for next summer, from Spitzbergen over the Pole and unknown Arctic regions to Alaska. The newspaper states financial backing has been assured and the expedition will include Lincoln Ellsworth, who was with Amundsen's party this summer.

Made Productive By Irrigation. Situated in the centre of a district which has changed from a comparatively barren cattle raising country to a productive fruit raising area by irrigation, Kelowna was the scene of the nineteenth annual convention of the Western Canada Irrigation Association. Delegates from British Columbia, Alberta and Saskatchewan, as well as representatives of the railways, governments, etc., were in attendance.

Is Entitled To Crow's Nest Tariff. Calgary Transportation Expert Says Rates Should Apply to Peace River. The Peace River is entitled to the benefit of the Crow's Nest rates on grain and flour, without further action by the government, is the opinion of William Innes, local transportation expert, and chairman of the transportation committee of the Calgary board of trade. This opinion puts the present situation in the north in a new light, as the general impression is abroad that reduction of rates to move this year's grain crop on the B.C. and B.C. would be a matter of negotiation between the government and the C.P.R. "I'm absolutely positive that the Crow's Nest freight rates should apply to the Edmonton, Dunsagan and British Columbia line, as well as to any other in the west," declared Mr. Innes. "I know that the recommendations made by the provincial board of trade who recently met in Edmonton, to the Dominion railway commission, took it simply for granted that the E.D. & B.C. would benefit from the Crow rates just as the other prairie lines. It certainly would be unfair to suggest anything else."

In Mourning For Sir William Petersen. Ship Will Display Broad Ribbon Mark For Six Months. Montreal has, for the first time, seen a ship in mourning. It was the Rio Dorado, of the Petersen Line. As she steamed up the St. Lawrence, the now famous "corrugated ship" was conspicuous for a broad blue band painted all about the hull. The ship is in mourning for six months as a mark in memory of the late Sir William Petersen, head of the line, who died suddenly in Ottawa some time ago while on a visit in connection with the proposed ship subsidy plan. Captain R. Hoeklin, who gave evidence before the ocean rate committee in the House of Commons in praise of the "corrugated" ship experiment, is in command. He reported his vessel continues to live up to her record for speed on a 60 per cent. consumption of fuel.

Ancient Human Culture. Interesting Discoveries Are Made By the Asiatic Expeditions. Extensive evidence of the human culture in Mongolia 12,000 or more years ago has been unearthed by the third Asiatic Expedition of the American Museum of Natural History, according to a cable from the leader, Roy Chapman Andrews, received by The Asia Magazine. Among the other results reported are the discovery of 40 dinosaur skeletons million years old, dinosaur eggs and skulls, the pre-mongol human skeletons, remains of ancient animals and a large collection of stone weapons and utensils of the pre-historic dwellers of the Asian plateau.

Has Remarkable Brain. American Now Visiting in London Gives Astonishing Exhibition. Six brains in one are said to be possessed by Mr. Harry Kaine, an American now visiting in London. Simultaneously he will read a newspaper, write the headlines upside down and backwards on a blackboard, at the same time spelling the words (to the right way); speak continuously to his audience; answer questions giving the exact populations and industries of the biggest towns of Great Britain, Canada and the United States; write backwards and upside down columns of figures which totalled 7,123,546,937, a figure previously agreed upon by the audience.

Each Day One Should Eat. Some fruit, either raw or cooked. Some bulky vegetable, such as lettuce, spinach, carrots or cabbage. Some laxative food, such as prunes, figs, orange juice or bran cereal. All the milk and water one desires, but at least four glasses of water must be taken each day to flush the kidneys.

OUR CROSSWORD PUZZLE

Crossword puzzle grid with numbers 1 through 50 indicating starting points for words.

- Horizontal: 1-Cruel oppression, 21-Linger, 22-Natives of a country, 14-Upon, 15-Advertising sheets, 18-Protestant Episcopal (abbr.), 19-Be drowsy, 21-Linger, 22-Natives, 23-Ripped, 25-Affirmative, 26-Cardinal point (Scottish), 27-Perform, 28-Listlessness, 30-Likely to be true, 31-Court proceeding, 33-City in Vermont, 35-Money factory, 36-Part of the body, 38-To bless with the sign of the cross (Scottish), 39-Ovule, 40-Reprimand (prov. eng.), 42-Building site, 43-Continent (abbr.), 44-Sid instead of revolving, 46-Turkish academy (abbr.), 47-Dip out water, 48-Dry, 50-Confessions flavored with peppermint. Vertical: 2-Type-space, 3-III, 4-Definite locality, 5-Written subject, 6-Those who use, 7-British sympathizer, 8-Corners, 9-Bone, 10-State of being contented, 12-Excessively emotional, 15-Middy, 17-Prized, 18-Country of South America, 20-Covering with hanging cloth, 22-Inorganic, 24-Irridancy, 26-Broad two-edged dagger (obs.), 28-Cymbals used by devotees (Hindu), 29-Recede, 32-Gulf in Baltic Sea, 34-Thumt, 36-Like an old woman, 37-Mistress, 40-Leap lightly, 41-Fairy (Persian mythology), 45-Juler of a tree, 46-Noble, 47-Exist, 49-Behrim tremens (abbr.).

In Mourning For Sir William Petersen. Ship Will Display Broad Ribbon Mark For Six Months. Montreal has, for the first time, seen a ship in mourning. It was the Rio Dorado, of the Petersen Line. Saskatchewan took 9,303, Manitoba 6,553, British Columbia 6,409, and Alberta 5,843.

Slavery Still Practiced. League of Nations Recommends Universal Abolition of System. Slavery is openly practiced in several Asiatic Mohammedan states, particularly in the Arabian peninsula, including the kingdom of the Hedjaz, where many slaves are girls who come from the Far East as pilgrims to Mecca, says a report by the slavery commission of the League of Nations published at Geneva.

Ancient Human Culture. Interesting Discoveries Are Made By the Asiatic Expeditions. Extensive evidence of the human culture in Mongolia 12,000 or more years ago has been unearthed by the third Asiatic Expedition of the American Museum of Natural History, according to a cable from the leader, Roy Chapman Andrews, received by The Asia Magazine.

Metals Can Be Made Thin. New Process Makes Them Transparent. As Glass Says Berlin Doctor. Dr. Karl Mueller, of the physical research bureau, Berlin, claims to have discovered a process whereby it is possible to reduce metal foil to a thickness of one-millionth part of a centimetre, while retaining its elasticity. The process, as explained by Dr. Mueller, can be applied to all kinds of metal, including gold, rendering them transparent.

Will Make Another Trial. Amundsen Plans New Polar Expedition For Next Summer. The Aften Posten, Oslo, Norway, states Captain Amundsen, since his arrival home from his recently attempted flight to the North Pole, has been preparing a new aeroplane expedition for next summer, from Spitzbergen over the Pole and unknown Arctic regions to Alaska. The newspaper states financial backing has been assured and the expedition will include Lincoln Ellsworth, who was with Amundsen's party this summer.

Made Productive By Irrigation. Simultaneously he will read a newspaper, write the headlines upside down and backwards on a blackboard, at the same time spelling the words (to the right way); speak continuously to his audience; answer questions giving the exact populations and industries of the biggest towns of Great Britain, Canada and the United States; write backwards and upside down columns of figures which totalled 7,123,546,937, a figure previously agreed upon by the audience.

Each Day One Should Eat. Some fruit, either raw or cooked. Some bulky vegetable, such as lettuce, spinach, carrots or cabbage. Some laxative food, such as prunes, figs, orange juice or bran cereal. All the milk and water one desires, but at least four glasses of water must be taken each day to flush the kidneys.

No Reduction Of Navies Should Be Made Now Says British Admiral

Montreal.—"This is certainly not the time to consider reduction of navies or naval armaments," was the answer given by Vice-Admiral Sir James A. Fergusson, commander-in-chief of the North American-West Indies squadron of the Royal Navy, upon his arrival here on board his flagship, H.M.S. Calcutta, to a query upon proposals for reduction in armaments.

Sir James has been away from England for over a year, but he has followed the developments in the Old Country in his absence with the greatest interest, he says.

It was futile to talk of cutting down naval armaments in the light of events, he said. But when he was asked to establish his views on Canada's navy, he demurred, saying that it was not his desire to talk of the Dominion's "navy" or lack of a navy.

"I can say this, however, that your men are remarkably keen. One of your ships, the Patriot, has been with the squadron and the officers and men are excellent. They show remarkably fine spirit."

Wheat Board Surplus

Saskatchewan's Share To Be Paid At Once

Ottawa.—Confirmation of the arrangement for the immediate payment of Saskatchewan's share of the wheat board surplus was made here by Hon. J. A. Robb, acting minister of finance.

The sum in question, totalling approximately \$268,000, will be forwarded to the Saskatchewan Government in the course of the next two or three days, and represents, it is understood, the proportion of the surplus due to that province, of those who had sent wheat to the board for sale and distribution, at the time the Canada wheat board gave up office in 1921. Payments of the respective shares due to Alberta, Ontario and Quebec have already been made, it is stated.

Painlevé Cabinet Doomed

Paris.—Premier Painlevé's compromise cabinet was doomed when the Socialist Congress, representing 104,000 members, voted against giving support to the present cabinet.

The resolutions of Leon Blum and Paul Faure, declaring war on Painlevé, were carried by 210 votes against 559, for a motion urging a benevolent attitude toward the present government.

Attempt On Life Of King Alfonso

Hendaye, France.—An unverified account of another attempt on the life of King Alfonso, of Spain, was given by a returning traveller here.

According to this account, a man was arrested at Santander, Saturday night, as he was in the act of drawing a large revolver in the presence of the King. A detective plucked his arms before he could get the weapon out of his pocket.

New Grain Inspector

Calgary.—George Hill, Dominion Government grain inspector in Calgary, has been offered and accepted the appointment of chairman of the grain appeal board authorized by the board of grain commissioners under the new Grain Act.

Mr. Hill will commence his new duties on September 1. He will be located in Calgary.

May Visit U. S.

Paris.—Finance Minister Caillaux announced at the Anglo-American Press luncheon here that he would in all probability go to the United States, and that if he does it will be to "settle this unhappy question of debts."

To Safeguard Public In Britain Against Unrest Fostered By Communists

London.—The Daily Mail says that the home secretary, Sir William Joyston Hicks, has decided in favor of the rapid recruitment of special constabulary as one of the steps necessary to safeguard the public against the unrest fostered by Communists.

The Mail asserts that Socialist and Communist extremists are ceaselessly preparing for the struggle they wish to precipitate, either when the time comes to give effect to the recommendations of the coal commission, or earlier, should trouble develop in the railways.

The paper declares that John Wheatley, who was health minister in Ramsay MacDonald's Government, is founding at Glasgow "Workers' Defence Corps," which he hopes will achieve membership of 10,000,000 men ready to fight against attacks on their standard of living, and that he is urging every labor organization in the country to obtain pledges from its members in this class war, which, says the Mail, exists only in the minds of the Communists.

It is recalled that during the recent coal trouble the creation of special constables was reported and later denied.

Worried Over Polish German Trade War

Danzig Business Men Do Not Profit By Exemptions

Danzig.—The trades war between Poland and Germany now in progress may have one beneficial result in the opinion of many Danzig business men. If it will mean the defection of Upper Silesian coal to the countries bordering upon the Baltic Sea which were formerly a part of the Russian Empire, such a defection would, in their opinion, prove an advantage to four interested groups; the Poles would have a promising new market in exchange for the German; Danzig would gain much new business as the shipping port; the Baltic countries could obtain the coal more cheaply than they can now buy English coal; Germany could dispose of her Ruhr coal without the interference of Upper Silesian coal competition.

The people of Danzig are the innocent victims of another phase of the rate war between Germany and Poland. Goods of purely Danzig origin may go to Germany unmolested and in return foristuffs and other articles intended purely for Danzig are permitted to come into the Free City exempt.

As a matter of fact there are practically no "goods of purely Danzig origin," consequently exempting that class of merchandise affords little comfort to the Danzig business man.

Criticizes Canada's Navy

Sarcastic Article Appears In Weekly Paper In London

London.—A writer in Truth, the weekly paper which frequently comments upon the paucity of Canada's contribution in the British navy, says: "As The Toronto Globe recently was very much displeased with me for quoting the precise figures of the Dominion's contribution to the sea power of the empire, I think it right to tell the world that one-half of the active Canadian navy has now put to sea to cruise in company with the Capetown of the North American squadron. In other words, the destroyer Patricia has left her moorings at Esquimalt and will not return until the beginning of October.

"What the other half of the active Canadian navy is doing I have no information at the present moment, but I believe she is assuring the

Ready To Argue Claims

British Columbia Has Completed New Case In Freight Rates

Victoria, B.C.—British Columbia has completed preparation of its new freight rates case, based on recent parliamentary legislation. It has been announced by Premier John Oliver, after G. G. McGeer, government counsel, had telegraphed to the railway board, urging an immediate ruling or an immediate argument on this province's claims for lower western grain rates.

"We are ready now to argue our claims any time," Mr. Oliver stated. "On account of the rate legislation passed by parliament at its recent session, we will hold the railway board actually has no alternative but to give us the same rates on westbound grain as those prevailing on eastbound grain. We assert we are entitled to Crow's Nest rates and want them to apply on the movement of this year's crops."

Edmonton.—A saving of about five cents per bushel to Peace River farmers and shippers will be effected if the railway commission gives an order making the Crow's Nest freight rates on grain applicable to the E. D. and R. C. and Central Canada Railways. Request to the board for such an order has been made by A. Chard, government freight supervisor, and it is expected the reduced scale will be effective in time for the movement of this season's crop.

Predicts War Between States and Japan

British Author Says Conflict Will Start March 3, 1931

London.—Japan will declare war on America on March 3, 1931, by completely blocking the Panama Canal. Japan will then capture the Philippines after wiping out the American Asiatic fleet. A mighty Japanese air fleet launched from ships will proceed to bomb and destroy San Francisco, Oakland, and Los Angeles.

After a tremendous loss of life, money and territory, the American fleet will win the war by annihilating the Japanese grand fleet in mid-Pacific in one of the greatest battles in naval history.

This prediction of conflict between America and Japan is made in a book, entitled "The Great Pacific War," by Hector Dewar, noted naval expert, published here, is causing keen interest in military and naval circles.

Determining Sanity Of Scott

Case Appears to be Puzzling Specialist Who is Investigating

Chicago.—Russell T. Scott is described as an "undetermined case," possibly a paranoiac subject to delusions of persecution, by Dr. Stubbfield, superintendent of the Chester Hospital for the criminal insane. "I don't know whether he is sane or insane," Dr. Stubbfield was quoted, in a special dispatch to the Chicago Tribune from Chester, where the convicted murderer of a Chicago drug clerk recently was taken after a jury had decided that he had become insane. "It is too early to tell yet."

Scott has begun to take up writing. "I am trying to analyze my case," he said. "I suppose in one way I had all this coming to me. No one ever took such fine things as I had—home and wife and children and friends and business opportunities—and threw them away more recklessly."

Cattle Shipments Hampered

Shortage of Steamers at Montreal Creates Acute Situation

Montreal.—Lack of ships for cattle shipments is hampering the transportation of cattle from Canada through the port of Montreal to Great Britain. The situation has become so acute that ships have been chartered in New York and Boston to carry cattle from Halifax and St. John, N.B., during the summer months, but the costs are too prohibitive to allow these steamers coming all the way from American ports to Montreal for cattle.

Still At East Cape, Siberia

Nome, Alaska.—The steamer and sailing schooner Maud, which Capt. Roald Amundsen dispatched in 1922 to drift across the North Pole is still at East Cape, Siberia, awaiting reindeers from a Russian steamer, wireless dispatches received here indicated. The Swenson Company's trading vessel, Blue Sea, enroute to Nome from East Cape, reported all was well aboard the Maud.

Chicago Editor Dead

Chicago.—Victor F. Lawson, editor and publisher of the Chicago Daily News, is dead. Mr. Lawson had suffered heart attacks in recent years from overwork, and an attack with acute dilation, proved fatal.

Visit Of Prince Of Wales To South America Held Of Universal Importance

Return Russian Warships

French Government Decides to Hand Ships Over to Soviets

Paris.—The French Government has decided to hand over the Russian warships now at Bizerta to the Soviets. The Soviets, in an agreement drawn up by Ambassador Krassin and Deputy Vincent Danbeiz, the French delegate, recognize the Czarist debt of \$1,500,000,000 and give French capitalists a contract to reconstruct Russia in return for huge French credits.

The Soviets promise every one of the four million French Russian bondholders ten per cent. of his holdings in new Soviet bonds and ninety per cent. in bonds of new Franco-Russian companies, which will be formed to exploit mines, forests, factories and oil fields in Russia. However, it is understood that the whole debt has been reduced from gold to paper francs.

The Russian fleet at Bizerta, formerly held by General Wrangel who was defeated by the Soviets in the Crimea, consists of two dreadnaughts, two battle cruisers, nine destroyers, four submarines, one school ship and some auxiliaries.

Leaves Cares Of Office

Officialdom of Britain Off on Autumn Holiday

London.—If a rival power should open war on England tomorrow, the measures of defence would have to be organized by junior officials. The British Government has gone grumbling, motoring and general holidaying.

King George and Queen Mary are visiting Princess Mary at Goldsborough Hall, Yorkshire. Prime Minister MacDonald is in Worcester-shire, Winston Churchill has gone to Surrey, where he is painting pictures. Lord Birkenhead is shooting in Scotland, where are also Admiral Lord Beatty, Field Marshal Earl Haig and other chiefs of the fighting services. The home secretary has gone to the country to give the Communists a rest for a while while he shoots grouse, and the war minister has gone to the seaside to recuperate.

Most of the chiefs of the permanent staffs of the government offices are also taking holidays in the last half of August and first of September.

Geologists Have Narrow Escape

Alberta Professor and His Assistant Nearly Lose Lives

Edmonton.—Shipwrecked on the North Saskatchewan River, lives nearly lost and valuable cargo gone to the bottom, was the experience of Dr. J. A. Allan, professor of geology in the University of Alberta, and his assistant, R. L. Lamb, who have returned from an adventurous trip.

They were on a geological survey along the river when their boat struck a boulder about 20 miles out of Rocky Mountain House and capsized.

Neither of the men were injured, beyond shaking up their nerves, but more than \$500 worth of outfit, including instruments, maps and photographs, was lost.

Is No Doubt Now Of A General Election Being Held This Fall

Ottawa.—Although officially nothing has been announced and may not be for a fortnight, there is no doubt now of a general election this fall. It will not come early and may be as late as November, but it is coming.

All the preparatory signs were in evidence following the cabinet council of the last week and the character of personal interviews. Organizers and members have been busy and have left in a hurry, returning officers are being appointed, conventions held here and there and other activities clearly indicate the course in view. In Liberal circles a small minority of the cabinet but a large number of private members have sought another session, but it is not clear to the supporters of the ministry how this process could possibly be of political benefit, whereas it might be fraught with danger. To all intents and purposes the campaign is now on in a preliminary way.

Buenos Aires.—The newspapers of Buenos Aires comment extensively in a complimentary vein on the visit of the Prince of Wales to the Argentine. It is necessary to remember, says La Nacion, that the Prince, whose face is familiar through all the world and who everywhere is welcomed, one day will be monarch of the "greatest empire the centuries have known."

The newspaper continues: "His word later on will weigh in human destiny and the world which knows the innate goodness of his heart, tranquilly awaits the time when his counsel will perhaps guide the fortunes of several civilizations."

One of the surprising things about the Prince, says La Nacion, is his sober manner when he answers the plaudits of the crowds.

"This is not the salute to which we are accustomed. It is the intelligent, sympathetic attitude of an illustrious traveler who wishes to understand and know a people."

An afternoon paper, La Razon, says that thanks to the Prince's visit, Britain has turned upon the Argentine the searchlight of her curiosity. La Razon points out that Buenos Aires is to South America what London is to Europe and that his visit, therefore, is not of purely British and Argentine significance, but rather of universal importance.

Saskatchewan Lignite

Briquetting of Saskatchewan Lignite Technically Successful

Regina, Sask.—Carbonizing and briquetting tests on Saskatchewan lignite, which have recently been carried out in Germany, have proven technically successful, said W. C. Worcester, professor of ceramics engineering at the University of Saskatchewan, who was in charge of the tests and reported to the government upon his return to the city.

The tests have been carried out during the past two summers at two of the largest briquetting plants in Germany. These were Thyssen & Company, at Dortmund, and the Yuniol Company at Frankfurt. Fifty-two tons of lignite from the mines of the Western Dominion collieries at Taylorton were used in the tests.

Tourist Traffic Heavy

Over Two Hundred Cars Go Into Banff Daily

Edmonton.—Two hundred and twenty motor cars per day have been going into Banff this summer. The provincial highways branch has a statement from the superintendent of the Rocky Mountain Park showing that from June 1 to August 7 the traffic dues were collected at the east entrance to the park on the Calgary-Banff highway from 8,560 cars westbound and 6,880 eastbound. This is a total of 15,240 for sixty-nine days, and the average is still keeping up.

Fire At French Exposition

Grenoble, France.—Automobiles, automobiles, electric appliances and Lyons silk valued at more than ten million francs (nominally \$500,000) were completely destroyed by fire in the transporting and touring building of the national exposition. A bolt of lightning set fire to the building.

An Interesting Experiment

Experimental Farm at Agassiz, B.C., Is Raising Queen Bees

An exceptionally interesting experiment is being conducted at the Agassiz, B.C., Dominion experimental farm. A start was made last year in the rearing of queen bees for domestic use. The colony selected for the purpose was the highest producer on the farm, it having yielded 210¹/₂ lb. of honey in one season. In his report for 1924 the superintendent, Mr. W. H. Hicks, describing the method adopted, says queen cells were obtained by raising all the brood and young bees possible from the brood chamber and leaving the queen in the lower chamber, which was filled with empty combs. A wire screen was placed between the parent hive and the super containing the brood, with an entrance made at the rear. Two days later a number of cells were found and on the sixth day the queen cells were grafted to frames. These frames were placed in de-queen colonies. From the eight colonies treated in this manner six queens emerged, two failed to mate, while the remaining four were large and mated well with pure drones, as the young bees produced were golden and uniform.

Sale Should Be Stopped

Revolvers, Whether Cheap or Expensive, Are Deadly Weapons

Six factories in one town in Spain are devoted to the manufacture of cheap revolvers, and 600,000 of these murderous weapons are exported to the United States each year on the orders of conscienceless dealers who dispose of them to any person who may seek to buy. It has been proven that many of the murders committed in Chicago are due to the use of the Spanish-made revolvers. The tariff commission will now recommend to the president that the importation of cheap revolvers be stopped. —Day City, Mich., Times-Tribune.

"Penny wise, pound foolish," says the Ottawa Journal. "If there is any good argument for stopping the importation of cheap revolvers, the same argument is good for stopping the importation of all revolvers. If revolvers are an evil thing, are they any less evil when they are of the most efficient and deadly kind, as expensive revolvers are? And if good argument exists against importation of revolvers because they are evil, does not the same argument apply against home manufacture? Why permit revolvers, at all? Even our police are not supposed to shoot first."

A Higher Critic

Colored Preacher Objected to Having Sermon Spoiled

The "monkey trial," at Dayton, Tennessee, brings to mind a sermon preached by a colored gentleman on the subject of origins. "God made de black man out of some dark mud what he took 'n moulded into de form of man, and dea set 'em up agin de pallis' fer to dry. Den He took some white mud 'n moulded de white man and set him up agin de pallis' to dry. Den He made woman." "But who made dea pallis'?" asked a critical listener. "You sit down, brudder," thundered the preacher. "Sech questions as you all am askin' would jes' natchurly ruin any system of teology." —London Morning Post.

Clever Work Of Sicilians

One of the most unique exhibits ever displayed in Canada, and one which attracted attention from one end of the Dominion to the other, is the display of the miniature Holy Land which has been shown in Edmonton. This miniature of the Holy Land was manufactured by Gaud Brothers, two Sicilians, who have been working for more than eleven years on the exhibit. The exhibit includes sixty million pieces and has 900 moving figures. Biblical scenes in amazing details are reproduced in miniature. The exhibit is to be shown throughout Canada and the United States.

Decides When Eggs Are Fresh

When is an egg fresh? After three days' deliberation, which shows how serious the question is, a French court has decided that an egg is fresh when it is not more than two weeks' old in autumn or more than three weeks' old in winter. Hereafter eggs in France will bear in red ink the date when they were laid.

Chinese history dates back to 2637 B.C., when the people were made up into clans or tribes and were ruled by a sovereign.

Printing and gunpowder were invented in China, and the first newspaper in the world was printed in Peking.

Estates Of British Nobility Disappearing

Lands of Late Lord Leverhulme Now In Market

Day by day the vast landed estates of the British nobility keep coming into the market for sale under the auctioneer's hammer.

Latest of those announced for forthcoming sales is the great sporting estate of the late Lord Leverhulme, comprising more than 360,000 acres. It is to be broken up and sold in portions by auction unless a buyer in the meantime is found for the whole estate.

It includes, besides large Scottish upland holdings, Harris Island, which is eighteen miles wide by twenty-one long, and several smaller ones. In the properties are included over 42,000-acre deer hunting and sporting tract, and another of 22,000 acres, with excellent facilities for salmon fishing, so the auctioneers announce.

Another well-known Scottish sporting property that has just come into the market is Colnagar, an estate of about 39,000 acres famous for its all-round shooting.

"The deer forest and moor of Colnagar are capable of yielding 100 stags and 5,000 brace of grouse respectively," says the auctioneer's card. "The salmon fishing is late, and there is capital trout fishing."

Oldest Pen In Existence

Made of Bone and Very Simple in Construction

Of course we know that thousands of years ago the ancients used to write on stone tablets. And if we were at all interested in this sort of thing, we know that they used an instrument called a stylus instead of a pen. The stylus was made of iron, bone or some hard substance that could be given a good sharp point. The tablets on which one wished to write were first coated with a thin layer of wax, and they wrote with the pointed end. The other end was blunt, smooth and somewhat expanded so any mistake could be smoothed out in the wax.

Students know all this, but they really didn't know just exactly what this stylus looked like. They had tried to reconstruct one from the knowledge that they had, but they were not sure of course.

And now one of these old pens has been discovered. It is the oldest pen in existence, being not less than four thousand years old. It is made of bone and is very simple in construction. It is six inches long, with a triangular cross section and tapered ends.

Gathering News In Japan Is Difficult

Slow Wire Service Overcome By Using Carrier Pigeons

While there are 19 daily newspapers in Tokyo, and hundreds of others throughout the empire, the gathering of news in Japan is somewhat more difficult than it is in other countries. The reason is that the telephone and telegraph services are exceedingly primitive and almost worthless for the rapid transmission of news.

The tardy wire service, however, is overcome to some extent by the use of carrier pigeons. Every news agency and large newspaper has its own specially trained birds which daily are sent by train to the various correspondents. The pigeons, when released with the thinnest of "copy" sheets attached to them, make rapid time back to the editorial rooms.

Have Right of Way

The appearance of a large automobile with a powerful blue light in front of the canopy over the driver's seat has puzzled many during their jaunts in the West End of London. It is one of two cars used by King George and Queen Mary, and the blue light has solved a problem that puzzled the police authorities for some time. When the King and Queen were returning from a function at night their car was often held up in the traffic. So the blue light was fixed to two of the automobiles. Whenever one appears, no matter what time of the night, it is given right of way, other traffic being held up.

Manitoba Doctors Will Assist

Dr. A. Stobart and Dr. Saint, of the department of agriculture, have left for Charlottetown, Prince Edward Island, where they will spend several months in assisting with the testing of the 120,000 cattle on Prince Edward Island, where a restricted area is being formed for the eradication of bovine tuberculosis.

World's Largest Dam

More than 750,000 pounds of dynamite have been used in building the world's largest rock-filled dam near Burlington, Ky. More than 4,000,000 tons of rock were blasted away.

Indians Did Not See King

Three B.C. Chiefs Wanted to Enter Protest Regarding Lands

Four figures in tragedy sailed aboard the Canarder Aurora from Southampton says the London Evening Standard, describing the departure of the Indians, Basil David, Johnnie Chillichistla, William Parrish, of British Columbia, and Mrs. Julian Williams, interpreter.

Mrs. Williams said: "They tell us that the King is on a holiday and cannot see us. The result is that we have simply thrown away a lot of money crossing the Atlantic to see him, but we are not deterred. We shall come again."

The three Indian chiefs went from British Columbia to protest to the King concerning the tenure of their lands and the trapping of game. They claimed certain rights had been taken away from them which were guaranteed to them by the British Government of many years ago.

Canada's Waterpower Industry

The latest statistics on the waterpower industry of Canada shows a total installation of 3,570,000 horsepower, which places Canada next to the United States in the nations using hydro power. The installation of waterpower in the Dominion, based on an estimated population of 9,227,000 is placed at 387 horsepower per 1,000.

His Hat

"You say you've worn this straw hat three years," said the hatter. "Wonderful! It looks like new."

"Yes, three years I've worn it," said the customer. "Once I had it re-blocked, twice I got it cleaned and once I changed it in a restaurant for a new one." —Chicago News.

The velocity of the most rapid earthquake waves is 300 miles a minute.

Two Systems Of Government

British Plan Has Many Advantages Over United States

The British system of government has advantages over ours in such matters. When a prime minister gets a report from a commission of his appointing and decides that its recommendations should be carried into effect, he has the assured support of parliament for his policy and can count on its ratifying his proposals for his position as premier is held by reason of the fact that he has a majority in that body which will do as he asks. A report to an American president by a commission he creates, however, leads no further than a suggestion by the executive to the legislative department that its purport should be made law. Congress is not bound to heed such counsel. Often it does not. —Detroit Free Press.

Germans Are Saving Again

Banks Show Increasing Deposits Since Mark Was Stabilized

Recent savings bank figures show that the Germans are beginning to save again and in the past year and a half the number of depositors has grown rapidly. During the inflation period no one in Germany thought of saving money.

It was a policy of either "spend it before it is worthless," or "get-rich-quick." Gradually, however, with the stabilizing of the mark value, the wisdom of economy has begun to reassert itself. Government officials and brain workers furnish the largest percentage of the depositors.

It is useless to worry; but it is useless to tell a man that it is useless to worry.

Seaweed As A Cure

Contains Iodine Necessary to Prevent Goiter Says Doctor

"The lowly seaweed, 'cussed' by many a pretty girl bather, has come into its own at last, as a protector of the same girl's beauty against the dreaded demon, goiter."

This was the declaration by Dr. J. W. Turrentine, of the United States department of agriculture, in a paper presented before the seventieth meeting of the American Chemical Society, Los Angeles.

Half of the girls living in a belt extending from New York to the Rocky Mountains are afflicted with incipient goiter, Dr. Turrentine said. "The growing child," Dr. Turrentine added, "should be given a daily portion of iodine. Goiter is caused by lack of iodine."

"Merely a seaweed diet," he recommended. "One thousandth of an ounce of dry algae, or seaweed, contains the necessary quantity of iodine. When processed and ground into a flour it can be mixed in every day-cooking."

Since the Dawn of Time

A vast treasure of fossils, dinosaur eggs and man-made implements, hidden since the dawn of time, and which may throw new light on life in remote periods, has been dug up and collected from the lonely sands of the Mongolian desert by Roy Chapman Andrews, American paleontologist, and his party, according to a cablegram received in New York.

Satan doesn't object to a man's attending church on Sunday if he gets his services the other six days in the week.

It is hard to make some people believe that the world goes round, because they have never got their share.

Modes And Morals

Abbreviation In Dress In Contrast to Earlier Fashions

The relation of modes to morals is one of those questions involved in delicate controversy for which the world has no satisfactory answer.

In nothing, perhaps, are men and women so much the creatures of environment as in the fashion of their clothes. The fact is that it is not so much the amount of clothes a person wears, but the manner of wearing them that defines modesty. The godly men of the Middle Ages found in the unseemly length of women's trains evidence of immodesty and had them discarded the earthly rumpsey. The towering starchy ruffs of the Elizabethan age were a mark for the anatomists and the puritans and at a later day the ermine-trim were a sure sign of moral decay.

Just now the world is running to an abbreviation in dress in sharp contrast to the mode of our grandmothers. To the older generation this tendency may seem to mark a lack of modesty in the age, but to the children of the generation the style has nothing to do with morals or lack of morals, propriety or impropriety. Future critics may smile at the lack of taste displayed by the flappers, but, recognizing the universality of the fashion, will hesitate to condemn a whole people. We can't all be had.

Morally or modestly is not a matter of a yard of silk worn here or discarded there. Conduct is a better guide.

It is not what she wears but how she wears it. —San Francisco Chronicle.

What Good Citizenship Means

Showing Lively Practical Interest in Welfares of Others

There are various ways of showing good citizenship, most of them obligatory. To be a citizen in good standing one has to observe recognized laws and ordinances and transgression of which brings punishment. You must contribute in taxes to the upkeep of the community. You are required to keep your premises in a sanitary condition. In other words, you are required to behave yourself generally. To be a good citizen, however, implies more than mere observance of laws. It means service, self-denial and sacrifice. Good citizenship requires your support of movement.

and the entire of the boys and girls, the young men and young women of your community. To simply live a passive moral and regular life, you are only doing what you have to do. To do something for the good of others is being a good citizen. —Allymer Express.

The Cost Of Politeness

Child Convinced It Is Not Conductive To Truth

It was not a formal luncheon, and the hostess's small daughter was allowed to sit at the table with the grown-ups. Throughout the meal her behavior was perfect. At last the girl, seated next her, turned to her small neighbor, candy dish in hand. "Wouldn't you like another chocolate?" she asked.

"No, thank you," replied the child, with a sigh.

Soon after this there was a lull in the conversation, and a little high voice piped up: "Do you know when I tell the most lies?"

The hostess looked apprehensive, and the girl asked indiscreetly: "When, dear?"

"When I'm being polite," declared the child with conviction. —New York Sun.

Paper Mill For Winnipeg

The Backus-Seaman application for a pulpwood berth in Northern Manitoba will be approved by the Federal Government, Hon. Charles Stewart, minister of the Interior, stated following a conference in Winnipeg. Mr. Stewart stated that he intended, on his return to Ottawa, to issue a contract immediately. It is the intention of the Backus-Seaman interests to establish a 250-ton paper mill in Greater Winnipeg.

National Interests

There are many evidences of an awakening sympathy between the peoples of the two extremes of the country, a sympathy that will grow into intimate and useful understanding when more Canadians fully appreciate the desirability of possessing first-hand information about their country—its present and its future. —Victoria Times.

In old times people multiplied on the face of the earth. Now they use adding machines.

Esquimo school children on the Yukon River, tuned in on 27 broadcasting stations in a single afternoon.

Six Hundred Varieties of Fish in the Rockies

Wapta Bungalow Camps in the Rockies, a popular resort for fishermen. Inset—Cut-Throat Trout from Bow River near Wapta Lake.

In the coastal and inland waters of Canada some six hundred species of fish disport themselves. By far the greater number are marine types, many frequent both salt and fresh water, others are entirely confined to the lakes and streams of the interior. On the Canadian Pacific coast no fewer than five kinds of salmon are to be found, these forming a natural resource of no mean value, indeed over-

month bass and the muskellunge are eagerly sought by men who yearn for the "strike" of a fighting fish. In this region are commodious Bungalow Camps operated by the Canadian Pacific Railway for the accommodation of sportsmen and for those who desire to enjoy a period of quiet recreation. Salmon trout are to be found in all the provinces, these fish invariably being of large size and cap-

fishery regulations which states that no net having a mesh less than eleven inches shall be used in Sturgeon fishing. In addition to this, there is a

Blueback Salmon from British Columbia

two thousand persons are employed in harvesting and marketing this one form of sea food.

Throughout the Rockies and Selkirk are several varieties of trout which, though relatively unimportant as a food source, yield excellent sport to the angling fraternity. Steamboat Lake in British Columbia has long been famed as a "good place to fish." In many Ontario streams the small

able of giving excellent sport to the line fishermen.

Sturgeon are to be found in many of the large rivers of Western Canada, the Nelson and the Big Saskatchewan, with their several lake expansions, yielding annually over one hundred and fifty thousand pounds of this kind of fish. That they attain to enormous size and weight may be readily understood from one clause in the

Salmon Trout from Lake Minawanka Banff, in the Canadian Pacific Rockies.

further provision that fish of this type under eighteen pounds in weight are to be regarded as "small fry" and, if captured, must forthwith be returned to their native element. The market for sturgeon is so remote and so uncertain that often the supply exceeds the demand. Indian fishermen are, on occasion, reduced to somewhat primitive methods in order to preserve their unwieldy catch.

It is perhaps erroneous to refer to the whale as a "fish," yet whale fishing is a regular industry in Canada, the entire area of Hudson's Bay being, so far as whaling is concerned, under control of the Dominion Government. For the information of ambitious "Waltons" who may be eager to land something "Big" it might be stated that a permit to catch whales is issued on application and on payment of the usual fee of fifty dollars. —Dan McCowan.

Sugar Factory

(Continued from front page)
 concerned they have had ample labor. A carload of Hungarians were routed through from the coast to Raymond and they have taken to the work readily. Work of thinning and hoeing has mostly been contracted, laborers earning as high as \$9 a day. The result has been that most of these Hungarians want land and want to bring out their families.
 Mr. Taylor dropped into Brooks unexpectedly. He went over the district thoroughly, visiting the outlying plots. There is no doubt but that he had in mind the location of another beet factory in Southern Alberta. He was satisfied with the fertility of the soil here, and said that some of the best crops compared very favorably with the best they had in the Raymond district. He left for Bassano Wednesday noon.
 Within a radius of 3 1/2 miles from the Raymond factory, Mr. Taylor said, they expected to have hauled by wagon, 22,000 tons of beets. Besides that they expect 300 carloads coming in from greater distances. The plant, he said, would have all it could handle this year. Beets should be worth \$10 a ton, that is for a 17% sugar content beet.
 Mr. Taylor said he would look forward to the visit of the delegation of farmers and business men from this district and promised he would see that they were shown around. It is hoped that as many as possible can will take in this

such value to Raymond, what would one be to us?
 If this land can grow beets as well as the Raymond country, and Mr. Taylor says it can, why shouldn't a factory be located in this district?
 If Mr. Taylor is looking for a site for a second factory why not make the big effort to land it?
 Adopt a slogan—"Sugar Beet Factory by 1927."

Walt Zobell Gets 40 Bus Per Acre on 73

Seventy-three acres of wheat yielding 40 bus. 10 lbs. per acre, is the record Walter Zobell phoned the Recorder yesterday. And the end is not yet. He hasn't threshed his best field. He promises us an even better story next week.

Rugby for Raymond?

A movement backed by the local Athletic Association is now under way to introduce the game of rugby football to Raymond sportsmen and fans. A meeting is to be held in the Town office at 4 p. m. next Sunday, Sept. 6th.
 It is to be hoped that this attempt will meet with success as rugby is one of the best of sports. All interested should attend the meeting.

Raymond Poultry To Enter Contest

D. C. Foster Provincial Poultry Registration Inspector, and A. E. Palmer Assistant Supt. of the Experimental Farm, inspected the Leghorn flocks of H. A. Jones and Bert Grand and accepted them as contestants for the next Egg Laying Contest which commences Nov. 1, 1925. Mr. Foster commented on the fine type of these birds, regarding both exhibition and utility.

Wild Horse Mesa is High Powered Drama of Early Days of Utah

Paramount has pictured another of those red blooded stories from

debut at the Rex next week end. To the lively plot, full of adventurous action and compelling drama, staged against a rugged, majestic background—a duplicate of the Wild Horse Mesa, a gigantic and practically inaccessible wilderness in Utah—has been added a spirited cast featuring such, sterling favorites as Jack Holt, Noah Beery, Billie Dove and Douglas Fairbanks, Jr.
 Chas. Weymer, a lover of horses, determines to catch Penguich, the leader of wild horse bands. From that point the action takes several surprising turns, and in the further development of the story, horse thieves, outlaws and Indians play an important part.

LOST—One black mare, one brown mare, lump on shoulder blistered, one sorrel pony branded DB on left shoulder, one grey gelding branded heart quarter circle right thigh. Strayed from my farm at Welling Sept. 27. Reward of \$5 for information leading to recovery.—Don Wilde, Welling, Phone B410.

More than 100 persons joined the ride of the Trail Riders of the Rockies on their horseback journey from Banff to Waipa Camp, via Marble Canyon and Lake O'Hara. The ride started on August 8.

Grain figures issued by the Harbor Commission of Montreal show that on August 1st all grain shipment records were broken by one day's delivery of 2,377,712 bushels of grain to outgoing ships. Harbor officials state that this is the first time that grain shipments in one day have topped the two million bushel mark.

Installation of machinery at the new entry of the Dominion Textile Mill at Montmorency Falls, Quebec, will be started by January first next. About 300 additional employees will be required to operate the plant. At present there are about 1,500 employed at the mills.

A prophecy that the Orient would become in the very near future a really large importer of Canadian wheat was made recently by Hon. Dr. J. H. King, Minister of Public Works. In predicting increased Orient trade in grain, Dr. King pointed out that imports of wheat from Canada for 1923-1924 increased by 400 per cent.

Over fifteen thousand men left the east on the first harvesters excursion from the east to the wheat fields in the middle of August. Four other excursions are to follow from Toronto later in the season. The first, when the harvesters returned from the east to the wheat fields in the middle of August. Four other excursions are to follow from Toronto later in the season. The first, when the harvesters returned from the east to the wheat fields in the middle of August. Four other excursions are to follow from Toronto later in the season.

Confidence of United States capital in the Dominion, optimistic preparations for the new Canadian financing, prospects of a good crop, large United States purchasing in Canada, and heavy expenditures of American tourists in the Dominion, were some of the reasons offered by New York financial experts for the consistent above par stand of the Canadian dollar on the New York exchange. The Canadian dollar is now at a premium on the New York exchange.

The total number of students in Canadian universities and colleges in 1924 was 52,639, or nearly one in eighteen of the total population, according to a bulletin issued by the Dominion Bureau of Statistics. Under the category of colleges, the total number in 1924 was 33. Of this total six are agricultural, two technical, two law, one dental, one for pharmacy, one for veterinary science, 28 theological, 39 affiliated, one school for higher commercial studies, one college of art and one military college.

During the coming winter Canada will see the debut of a new transportation device known as the Snow-motor. This consists of two hollow cigar shaped cylinders or drums to which flanges, resembling cork screws, are attached. These drums are fixed to an automobile or tractor in the place of the wheels and, by rotating actually float the machine over the snow. The snow-motor is regarded as especially valuable in the transportation of lumber; it can negotiate snow of any depth and can operate in countries where other methods of transportation are impossible or too costly and can also make roads which other vehicles can use. It is manufactured in Detroit and will be on the market in Montreal during the winter.
